Internet speed meter premium mod apk. Internet speed meter lite mod apk. Internet speed meter apk mod. Internet speed meter live mod apk. Internet speed meter lite premium mod apk. Internet speed test meter mod apk. Internet speed meter pro mod apk rexdl. Internet speed meter pro apk moddroid.

Download Speedtest Premium MOD APK (Premium Unlocked) to measure the speed of your network and experience the paid features of this app for free. Introduce about Speedtest While browsing the web and playing games, you often encounter unexpected problems such as the browser cannot load a Youtube video or the speed of downloading files is too slow. When encountering that situation, you usually reset the router or network plan you are using, but still, is the problem not fixed? Please check your internet connection speed with Speedtest. This amazing app will help you to test your internet speed. This way, you can notify your network provider if the connection is not really stable. Currently, the application is trusted and used by hundreds of millions of users globally. Check internet connection in 1 second In the past, when smartphones were not popular, Speedtest was just a web application platform that helped users using computers to measure network speed. But now, with the development of smartphones and the needs of users, the version of Speedtest application for Android is released completely free. Right after starting the application, on the screen appeared a circle icon flashes, circling the word “GO”. You just need to touch this icon to start testing the network speed. The application then connects to the network packet you are using, displaying a meter with a blue (or purple) histogram. These lines represent transformation. If there are not too many changes in the transmission line, it will be in the form of a straight horizontal line, indicating a stable connection. Along with that is the parameters of download and upload speed. Based on these two parameters, you can decide whether to download, or upload a large file or not? Speedtest has a global network of servers. They are scattered everywhere, with the purpose of connecting and returning results to users as quickly as possible. Moreover, after decades of operation, the accuracy of the application has also improved many times. You can totally trust the parameters Speedtest tests for you. Thus, you can compare this actual speed with the carrier’s package, see if they are cheating or having a connection problem. In addition, Speedtest also provides information about the network you are connected to. You can rate this carrier directly through the result interface returned by the application. It’s convenient, right? Security, free and fast VPN Not only is the network speed measurement app, Speedtest is also known as a VPN application, allowing everyone to browse privately. Sometimes, you go out and use public wireless connections. That is quite dangerous because hackers can take advantage of the lax security of public internet providers to steal information. But if you turn on VPN Speedtest, that worry seems to be removed. Furthermore, Speedtest is very respectful of user privacy. They will not collect data or browsing history when you turn on the VPN for their own benefit. You should also note that, when you turn on VPN Speedtest and perform a network speed test, the application will check through the VPN, not the direct connection. For Premium plan users, they can choose a region when using the VPN. With the shortened geographical distance, your internet access speed becomes faster and more optimal. Results history The results of each measurement will be saved in Results. Here, there is information about the type of network in use (3G, 4G, LTE or LAN, WIFI), measurement time, download speed, upload speed, Internal IP, External address, ect. Thanks to this history, you can get a better overview of the internet speed test, and how it changes over time. If they are not stable, sometimes very low, sometimes very high, you can rethink whether or not you should continue to use your internet package. Premium Unlocked: Unlock the VPN Premium feature. You can use VPN with a higher speed, allowing access to many different areas. Download Speedtest Premium MOD APK for Android Speedtest is a useful application that helps you to test your network speed accurately and quickly. It can give an overview of the connection speed being used, or even the network speed of each application running on your device. The term used to describe a satellite, launched by Japan, that is capable of providing Internet connectivity at speeds of 1.2 GB/sec around the world. Called the WINDS satellite, it was first launched in February 2008 and it initially focused on providing Internet connectivity in the Asia-Pacific region. It’s a joint venture between two companies — Japan Aerospace Exploration Agency (JAXA) and Mitsubishi Heavy Industries. See also Internet over satellite. Home - Android Apps - Tools - Signal Strength Premium 26.0.8 Apk Are you living or working in a low signal area ? Then this is the app for you. With this app you can get a good idea of the mobile signal strength and find out which corners of your office or home are having the best reception. You can also carry out download speed test with the site of your choice. What this app gives you:- Features: General User • Signal meter • Speed test • Phone check • Signal widgets Advanced User • Dual SIM info for Android Lollipop 5.1 onwards • Signal Logger • Detailed Network info • Neighboring cell towers info • Airplane or Restart Mobile Connection only without disturbing WiFi, NFC etc (Not available for >= Android 4.2) • Network Latency Widget or Delay of data connection • Out of service and roaming notifications. Pro Features(Inapp Purchase):- • AdFree IMPORTANT: • A very few phones/ROMs are not supporting signal strength refresh. If the Network Type and the Carrier are updating correctly but the signal strength is not updating then this is a sure sign of a broken ROM. This is a known issue and not a problem with the App. • Dual SIM info has been introduced from Android Lollipop 5.1 onwards and Advanced Cell Mode was introduced in Android Jellybean 4.2 onwards. There are still a lot of bugs in manufacturer implementations. Consider sending a debug report from the debug icon to incorporate workarounds. • If you cant find the widget in the list of widgets after installation change the orientation of device with the list of widgets opened. This will cause the list of widgets to get refreshed. Also do not move app to SD Card. As a last resort clear cache and force stop google app from android settings. • Check the extensive FAQs on my website. WHAT’S NEW • Bug fixes • 4G LTE Carrier aggregation will be labelled as LTE CA • 4G LTE Advanced Pro will be labelled as LTE Pro • 5G NR Advanced will be labelled as NR+ App Info: App name : Mobile Signal Premium Package Name : com.cls.networkwidget Developer: Lakshman Apk Md5 : 1f3ab85ad1ac7912a4f0525346604c7c Apk Size :5.84 MB Update on Play Store :06-Jul-2022 Version Name & Code:26.0.8 (2608) Requirements: 8.0 and up Download Apk More Info From Playstore Internet Speed Meter Lite adalah aplikasi yang menunjukkan berapa kecepatan internet Anda secara langsung. Aplikasi ini juga menampilkan tabel dengan jumlah data yang sedang digunakan. Ini membantu Anda mengontrol penggunaan data sehingga tidak akan melebihi batas sebelum akhir bulan. Bagian terbaik dari alat ini adalah selalu diperbarui dalam real time dan menyediakan informasi 30 hari terakhir, jadi Anda dapat mengelola data bulanan dengan baik. Anda dapat melihat tiga hasil di tabel, yaitu data yang digunakan dari penyedia layanan, data yang digunakan via WiFi, dan total keduanya. Ini membantu Anda mengetahui apakah jaringan di rumah bekerja dengan semestinya dan memastikan Anda menggunakannya alih-alih data dari penyedia jaringan. Anda dapat memantau aktivitas internet dengan membuka aplikasi dan mengecek status koneksi. Kelebihan lainnya adalah Anda dapat melihat berapa megabita yang telah digunakan dan bilah notifikasi sepanjang waktu. Ini artinya Anda dapat mengecek konsumsi data secara real time dan berhenti menjelajah internet jika harus menghemat data, atau mengaktifkan koneksi WiFi jika peranti Anda tidak terhubung. Pro Features Notification Dialog A notification dialog appears when you tap the notification having – Graph to monitor last minute internet activity – Time and usage of current session Smarter notifications Notification appears only when you are connected to internet. You can change priority of notification. You can also hide the notification when connection is idle for specified amount of time. Themes support You can manually select the color of UI. Blue status bar icon Option to choose between blue or white status bar icon. (only for KitKat and below versions of Android) Upload and Download Speed Option to show upload and download speed in separate notifications. Warning: Do not move this app to SD card. It will stop (Force close) when you remove the card. Download Links * Added option to enable WiFi SSID in notification pane * Bug fixes Home - Android Apps - WiFi Speed Test Pro 5.0.1 Apk Wifi Speed Test app is a wifi speed and local network (LAN) speed meter. The best speed test for your Ethernet network! Pro features: ✓ Ad free ✓ iperf support ✓ You can enable zoom in/out in the graph (visualization) ✓ You can change the default time frame in the graph to see more data Main Features: ✓ Test the speed of wireless and wired networks ✓ Test the Download and Upload Speed ✓ Save the past results of Wifi speed test automatically, including download and upload speed, ping, signal strength, network name, IP address ✓ Display IP address, network information, latency, signal strength, channel information ✓ Easy sharing of speed test results ✓ Test Windows share (SMB, Samba) speed ✓ Test the speed of FTP server ✓ Test can be done via TCP or UDP ✓ Internet speed test ✓ Tethering and hotspot support ✓ Easy sharing of test results If you want to test the network speed between two devices you need to have a second phone or computer to use it as server! You can download the server application (wifi_speed_test.exe/py) to your computer from here: Important: This is not an Internet speed test app! (however you can test the Internet speed as well, but this is optional) This application will measure the speed of your local network, live Internet connection is not required. WHAT’S NEW Preparing for Android 12 Added new icons Redesigned Speedometer tab Bug fixes App Info: App name :WiFi Speed Test Pro Package Name : com.pzolee.android.localwifispeedtesterpro Apk Md5 : 4d20912590ad61e776b413aea0bcb4c2 Apk Size :7.4 MB Update on Play Store :January 4, 2022 Version Name :5.0.1(101) Requirements: Android 6.0+ Download Apk More Info From Playstore
